Integrated Planning for DMT

What is the training about?

Data should not be used in isolation and this program brings integration in the use of data for district management across the DMT. By using data, silos are broken down and an in depth understanding other roles use of data points is achieved.

How long is the training? 3 Days

What is covered?

- **Basic dashboard navigation**
 - Understand the **five fundamental navigational tools** to manage the DDD Dashboard.
- **Data quality**
 - Impact of inaccurate **learner count** in school funding, school resourcing, and achieving a clean AG Audit.
- **Profiling schools**
 - Profiling **subject per phase** at risk.
 - Profiling **under performing schools**.
 - Profiling **educators** who require support.
- **Measurement and evaluation of interventions.**
 - Understand the importance of measurement and evaluation.
 - Know what data points are available for measurement and evaluation.
 - Be able to measure and **evaluate DMT interventions** at school level.
