DATA LEVER: School profiling

School teams: Circuit Management

How to prioritise schools for support?

FOCUS
To inform the intervention plans needed to focus support for schools in a circuit.

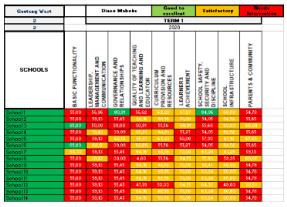
PURPOSE
For Circuit Managers to analyse and create a heatmap of the status of the schools in their circuit.

Where can I get data or guidelines for profiling my schools?

- The School Profile page on the School Improvement Portal – for the Data Rich School Profiling Reprofiling Tool.
- And the DDD Dashboard reports and subject views.

What documents are needed

- The documents available on the School Improvement Portal outline **the process to follow** to fill in the profiling tool.
- Complete a profile for each school in the circuit.



What are the outcomes of the school profiling?

- This profile results in a heatmap of the status of the circuit.
- Once the heatmap has been created, it is important to follow through with creating an action plan to support schools and SMTs.

The excel document can be used to profile schools **four times in the year**. Once profiling is concluded, use this document as a management tool during school visits and intervention planning.

When profiling the school, it is a good idea to refer to the SIP Action Plan.

When should school profiling be done?
