

Circuit Management

Educator Attendance:

Data analysis table - circuit managers

School name	Educator attendance	Educators highlighted in red on the Dashboard	Total number of days absent	Reasons for absence	Average age	Report Mark Pass rate of the subjects they teach	How they recovered for lost time	Support given by HOD/

Questions to ask when looking at this data:

- Which school has the lowest educator attendance? What are the common reasons for this statistic? What is the average age of the educators in the school?
- Which school has the highest educator attendance?
- What seems to be a contributor to the low attendance of educators?
- For the schools that have low report marks, do they also have a low educator attendance and number of days absent when compared to the other circuits?
- Which school has the highest number of educators highlighted in red and what is that schools Report mark pass rate compared to the other schools?
 - The purpose of this question is to identify if the number of days that educators are absent influences the performance of learners.

Tracking interventions - circuit managers

Educator Attendance	Circuit name	Person responsible for tracking	Circuit support	Support by district	Update on progress				
					Previous Year	Term 1	Term 2	Term 3	Term 4

Questions to ask when looking at this data:

- Does the updated progress show any improvement?
- Which school made the most improvement? What were the contributing factors to the improvement?
- Which school has made no improvement? What are the reasons for this?
